

# Fresenius Kabi is Doing More in America

Fresenius Kabi is a global health care leader that specializes in lifesaving medicines and technologies for infusion and clinical nutrition. Our products and services are used to help care for critically and chronically ill patients. Here's how we are doing More in America.

## More Leadership

A market leader in injectable drugs and delivery systems to treat a wide range of patients in America.

An extensive portfolio of essential sterile injectables.<sup>1</sup>

A market leader in lipid injectable emulsions (ILEs).<sup>2</sup>

Leading the way with smart RFID labeled medications.

## More Confidence

Bringing more products to market that can help improve safety and efficiency for physicians, pharmacists, nurses and patients.

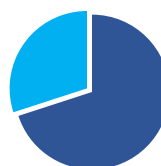

Simplist® Prefilled Syringes & Premixes

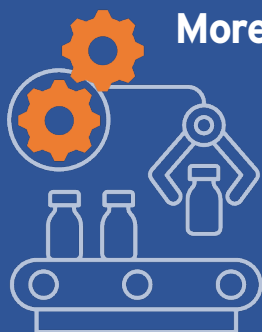

freeflex® IV Bags

## More Essential Medicines

Today, more than **70%** of the units shipped by Fresenius Kabi in the U.S. are drugs listed on the FDA's Essential Medicines List.<sup>3</sup>

## More Capacity

Nearly **\$1 billion** spent to expand our U.S.-based production and distribution capabilities and capacities.

**>70%**

of our pharmaceuticals for the U.S. are proudly formulated, filled and packaged in the U.S.<sup>4</sup>

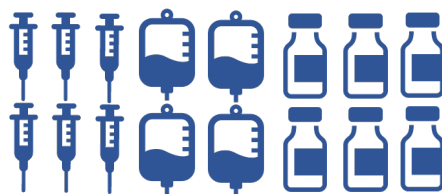

Backed by a global network of R&D centers and production facilities.

## More Access

**700+**

More than 700 SKUs in the Fresenius Kabi portfolio.<sup>4</sup>

**>350MM**

>350 million units shipped in last 12 months in the U.S.<sup>4</sup>

## More Oncology Options

**60+**

Unique oncology product codes, 12 products in market leading positions.<sup>5</sup>

**460+**

Chemotherapy regimens are supported by one or more Fresenius Kabi oncology products.<sup>6</sup>

**14,000+**

U.S. clinics and hospitals used Fresenius Kabi oncology products in 2020.

## A Commitment to Innovation

Growing and investing in the latest technologies and forward-thinking innovations to expand access and affordability.

### Biosimilars

Expanding access to life-changing medicines through advanced science, manufacturing and support.

### Contrast Agents

Bringing contrast agents to market providing value, choice and flexibility.

### MedTech

Ivenix™ Infusion System, engineered from the ground up to enhance patient safety and transform infusion delivery.<sup>7</sup>

### +RFID™ Smart Labels

Supporting a safe, more efficient medication inventory process.

Fresenius Kabi is working shoulder-to-shoulder with clinicians to build more confidence in the supply chain of care in America.
